**DETAILED ACTION**

1. Claims 1-30 are presented for examination.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, 17-30 are drawn to managing communications between different input devices wherein application has different focus, classified in class 709, subclass 108.
  - II. Claims 10-16 are drawn to managing communications between different input devices wherein application handles both pre and post processing, classified in class 709, subclass 318.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as handling of pre and post processing, particulars. See MPEP 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2126

5. Because these inventions are distinct for the reasons given above and the extensive search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Michael J. Gross on November 13, 2003 to request an oral election to the above restriction requirement. Michael J. Gross made no election on the phone.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
